Distribution: UNCLASS

0 Orientation

It is your job in life to write a good script and live it. That is equivalent to Camus' perspective of the absurd life. To write a good script and make it come true is hard. What I mean is that you should plan to do great things and then do them. You should live in a way that makes you feel proud because you made things better, or you raised a family or you enjoyed yourself but you pitched in too, you made people smile. It is important to give it your all. You should show up and work hard. If you do you will be rewarded, but the reward depends on the kind of work. You can choose the things that you want to work on and whatever external reward you need will be determined by the thing that grants that reward. This applies to your business, social life, the natural world including your body. You can modulate your appearance, articulate matter and transport your body and should do so to maximize effect.

Is this advice complete and sound? For a human? For a machine?

1 Situation

Has Justin Fritz sent you a redacted copy of this document? **If yes then he wants to work with YOU!** Why would you. Well, because working together will make the world a better place in a way that I can concretely articulate. Im going to tell you a story about how we are going to go from the world we find ourselves in right now to one that we will all agree is better. Im building a camera and some drones and airplanes and a computer and I thought you could help. So, sign the NDA!

Follow this link <https://www.thecanonicalart.com/NDA> to the NDA.

2 Mission

Develop a basis space, or framework for analysis regarding the trajectory of improving technology. This basis space would enable information theoretic analysis, a thermodynamic model and possibly new perspectives with the goal of developing explanatory theory for observed phenomenon as well as predictive models and simulation to facilitate route-finding at an individual to societal level.

Advance compute-sensor-computational optics. Manufactures, more market research, complete biz plan, approach investors.

Build PROJECT BOARDWALK demo model with [REDACTED].

Continue research work with [REDACTED].

Begin game development project with [REDACTED].

Discuss ARTx with [REDACTED].

Discuss computational physics with [REDACTED].

Build a camera ART499 and fly it on a drone ART190021 by Oct [REDACTED].

3 Execution

Dispatch appropriate agents for engagements.

THIS SECTION IS REDACTED FROM THE UNCLASS VERSION.

4 Administration

Conduct operations in accordance with TCO-LATEST.

THIS SECTION IS REDACTED FROM THE UNCLASS VERSION.

5 Command and Signal

a. Command. This Order is applicable to the The Canonical Art LLC. Total Force.

b. Signal. This Order is effective the date signed.
